Subject: laboratory device used for analysis of urinary albumin:creatinine ratio

Q1 Please can you provide me with information about the laboratory device used for analysis of urinary albumin:creatinine ratio?

I would like to know the following:

- a. The name of the laboratory device that is used to analyse albumin:creatinine ratio in the urine.
- b. The name of the chemistry kit (if not included in the first question) that is used to analyse albumin:creatinine ratio in the urine.

A1

- a. The equipment we use to do this analysis is the Abbott Alinity Ci analyser.
- b. The reagent kits for Urine albumin and Urine/plasma creatinine are made by Abbott specifically for this analyser.
