How to prepare Omeprazole 10mg in 5ml oral suspension

There are two bottles contained within the outer carton.

- **Bottle 1** is the **powder**
- **Bottle 2** is the **diluent**

Follow these instructions:

1. Gently shake **bottle 1 (large bottle)** to loosen the powder
2. Take the caps off both bottles
3. Pour the liquid from **bottle 2 (small bottle)** into **bottle 1**
4. Put the cap back on bottle 1 and shake it for at least 30 seconds.
5. After 30 seconds, take off the cap and insert the bottle adapter (bung) into the neck (top) of the bottle
6. Write the expiry date on **bottle 1**, this is 30 days from the date you have mixed the 2 bottles together
7. Throw away **bottle 2**

How to store omeprazole 10mg in 5ml suspension

All medicines should be stored safely out of the reach and sight of children

1. Before you make up the suspension
Store below 25°C
Store in the original package
2. After you have made up the suspension
Store in the refrigerator at 2°C to 8°C
Discard after 30 days
