Subject: Remote monitoring/virtual wards

Q1 Is a remote monitoring service offered on the Alder Hey Children's NHS Foundation Trust (AHCFT) virtual wards?

Please note that the question refers to any solution, for instance, any of the remote monitoring apps, dashboards, wearables monitoring kits, etc., even if the AHCFT does not contract it; instead, for instance, it is part of a pilot, part of a regional contract, or contracted by an independent Health Care Services Provider, however, provided under collaboration or other agreements with AHCFT virtual wards.

A1 Yes, although only for patients with certain conditions.

Q2 If remote monitoring services are offered on virtual wards, who is the technology supplier? Please note that the question refers to any of the remote monitoring apps, dashboards, wearables monitoring kits, etc.

A2 Isansys.

Q3 If AHCFT contracts remote monitoring services, what are the terms:
a) What is the start/end date?
b) What is the value of the contract (£000)?

A3 AHCFT does not have a contract with Isansys. Licensing is provided with the ad-hoc purchasing of device consumables.

Q4 If remote monitoring is not provided as a part of AHCFT virtual wards, is there a plan to procure a remote monitoring solution to support AHCFT T virtual wards? If yes, at what stage are these plans?

A4 Not applicable – as per A1
