Subject:	Senior Data Leadership and Data Technology Usage

Q1 **CIO and Chief Data Officer:**

a) Who is the current Chief Information Officer (CIO) at your NHS trust and please could you provide their contact email?
b) Who is the current Chief Data Officer (CDO) and please could you provide their contact email?
c) If your trust does not have a designated CDO, could you please provide the name and position of the most senior person responsible for data management and data governance within the organisation - and please could you provide their contact email?

A1 The Trust has a Chief Digital and Transformation Officer, which covers the remit of all roles outlined. Kate Warriner- Kate.Warriner@alderhey.nhs.uk

Q2 **Data Tools and Technologies:**

Could you please provide a list of the data tools and technologies currently in use by your trust (e.g., data integration, data governance, data quality, data privacy tools, data visualisation tools, data storage solutions, etc.)?

A2 SQL Server, PowerBi, Microsoft Tools (Excel)

Q3 **Expenditure on Data Tools and Technologies:**

What has been the total expenditure on data tools and technologies over the past five years (broken down annually and by line item, if possible)?

A3 We only have the breakdown on this for the previous 3 years:

BI – £135,000. £45,000 per annum
SQL – £645,000. £215,000 per annum
Statistical Process Charts – £45,000. £15,000 per annum
